

# Water Treatment & Testing CLASS AGENDA

---

## **Why Do We Test?**

An understanding of the problems caused in a boiler system and why it's so important to test the water going into the boiler system

## **Pre-Treatment**

The understanding of treating the feedwater prior to it entering the boiler system

## **Internal Boiler & Condensate Treatment**

A look at the boiler system and the different points after pre-treatment at which water treatment is introduced and the importance of it

## **Hands-On Lab & Testing**

An in-depth, hands-on lab whereas students will have the opportunity to train to real water samples to get a better understanding of the testing process
